

HPI Connect – The Career Portal at Hasso Plattner Institute

Your Recruiting Opportunity at the Excellence
Center for IT Systems Engineering

Design IT. Create knowledge.

The Hasso Plattner Institute

The Hasso Plattner Institute for Software Systems Engineering GmbH (HPI) in Potsdam is Germany's university excellence center for IT Systems Engineering. It is the only university institution in Germany to offer the bachelor's and master's degree program in "IT Systems Engineering" - a practical and engineering-oriented study program in computer science, in which 450 students are currently enrolled.

Besides learning the foundations of computer science, above all, students gain the ability to understand, develop and implement large-scale, highly complex and networked IT systems. In addition, HPI offers a wide range of interdisciplinary skills. With their industry-oriented, outstanding education, HPI graduates are well-qualified to take over a leadership position, such as software architect, project leader or CIO.

The Academic Program at Hasso Plattner Institute:

- University center of excellence for IT Systems Engineering
- Consistently top spots in the CHE university ranking
- An IT engineering education that is both practice-oriented and innovative
- Ten professors and over 50 lecturers, guest professors and contract teachers work at HPI
- Close cooperation with business and industry

Research Groups:

- Enterprise Platforms and Integration Concepts
- Internet Technologies and Systems
- Human Computer Interaction
- Computer Graphics Systems
- Operating Systems and Middleware
- Business Process Technology
- Software Architecture
- Information Systems
- System Engineering and Modeling
- School of Design Thinking

HPI Connect

www.hpi.de/connect

The online portal HPI Connect is a central information platform and interface between companies and HPI students. It provides companies the opportunity to contact HPI students directly and to engage them as employees. To achieve this, a wide variety of offers are available for companies on the platform.

Advantages:

- Establish contact to our students and alumni early on
- Present yourself individually as an attractive employer
- Actively seek talented young professionals
- Focus your current job offers on the target group

Offers for Companies

Job Board: Advertise Your Open Positions

Announce your openings for student jobs, internships and graduate positions for a period of four weeks via the online job market of the HPI Connect platform, including logo and PDF attachment. The job ads then appear in the job list of our career page sorted by date (the five most current listings also appear on the start page of the job portal). Via filter criteria (region, degree desired, etc) you can make it easier for students to find your job offer.

Company Profile: Present Yourself as an Employer

Present your company as an employer for a whole year with your own profile in the company database of the HPI Connect portal (including logo).

Events: Communicate Your Events

Communicate your own career-relevant company events on the HPI Connect portal (name, date and short description) for a four-week period.

Profile Database: View the Profiles of Our Students and Alumni

You have access to a database with the resumes of HPI students and alumni (abilities, experience, interests ...) to facilitate your search for interesting candidates. Based on given filter criteria, the system can make matching suggestions. In the event that you find a promising candidate, you can establish contact with the student via the system. Right of access to the database for one year can be acquired by way of the partner packet.

Company Contact Fair - HPI Connect

HPI Connect, the fair for company contact, is the networking event for companies, HPI students and alumni. Using the speed dating procedure you can present your company to each visitor for approx. seven minutes and provide information about jobs, internships or training programs. At the subsequent get-together the first contact can be deepened on an individual basis. HPI Connect takes place every year at the beginning of the summer semester.

Overview of Offers

Advertise Your Open Positions

- Announce your open positions, internships or student jobs on the online portal (4 weeks)
