More about openHPI apps at https://open.hpi.de/about

Innovative video technology
Dual video presentation via dynamic tele-TASK player with slide navigation. Adaptable video size, playback speed and bandwidth

Interactive exercises
Practical exercises for applying acquired knowledge

One chapter per week
Approx. 3-6 hours of required learning per week, depending on the course and prior knowledge of the subject

Active learning community
Course material is activated on a weekly basis, this means a simultaneous interchange about content in the openHPI forum and in virtual learning groups

Comprehension and learning progress check
Check comprehension and individual learning progress with interactive self-tests

OpenHPI course support
Prompt feedback from the openHPI teaching team and help desk

OpenHPI archive
Upon course completion the material remains available for self-study

Become Part of Our Community* and Stay Up-to-Date, Despite the Rapid Developments in Information Technology

- Learn in lively exchange with a dedicated community
- Discuss fascinating content with other participants and course instructors

*More than 100,000 enrollments from over 150 countries (August 2014)

openHPI* offers online courses for pupils that provide an introduction to the basics of programming.

Use openHPI to Keep Your IT Knowledge at Cutting-Edge Level

- Successful course members receive a confirmation of their participation with a graded certificate from Germany's most prestigious IT institute – a mark of quality attesting to competence in IT.

openHPI – The Online Educational Platform of Hasso Plattner Institute: Free and Open to Everybody

The openHPI course contents, based on the latest scientific findings from the HPI research labs, are clearly presented and can be accessed online at any time.

In our knowledge transfer we do not only rely on state of the art learning methods and media but also on the timely support of dedicated HPI experts. Our international and IT-inclined learning community provides a broad forum for questions, discussion and exchange - an important part of the learning process.
