## ABOUT ACM

ACM is the world's largest educational and scientific computing society, uniting educators, researchers and professionals to inspire dialogue, share resources and address the field's challenges. ACM strengthens the computing profession's collective voice through strong leadership, promotion of the highest standards, and recognition of technical excellence. ACM supports the professional growth of its members by providing opportunities for life-long learning, career development, and professional networking.

### Executive Director and CEO

Vicki L. Hanson

### Deputy Executive Director and COO

Patricia Ryan

### Director, Office of Information Systems

Wayne Graves

### Director, Office of Financial Services

Darren Ramdin

### Director, Office of SIG Services

Donna Cappel

### Director, Office of Publications

Scott E. Delman

## ACM COUNCIL

### President

Cherri M. Panceke

### Vice-President

Elizabeth Frances Churchill

### Secretary/Treasurer

Yannis Ioannidis

### Past President

Alexander L. Wolf

### Chair, SGB Board

Jeanna Matthews

### Co-Chairs, Publications Board

Jack Davidson and Joseph Konstan

### Members-at-Large

Gabriele Anderst-Kotis; Susan Dumais; Claudia Bauzer Medeiros; Elizabeth D. Mynatt; Pamela Samuelson; Theo Ezell Schlossnagle; Eugene H. Spafford

### SGB Council Representatives

Sarita Adve;  
Jessica K. Hodgins;  
Jenna Neeffe Matthews

## REGIONAL COUNCIL CHAIRS

### ACM Europe Council

Dame Professor Wendy Hall

### ACM India Council

Srinivas Padmanabhuni

### ACM China Council

Jianguang Sun

## BOARD CHAIRS

### Education Board

Mehran Sahami and Jane Chu Prey

### Practitioners Board

Terry Coatta and Stephen Ibaraki

## COMPUTER SCIENCE TEACHERS ASSOCIATION

Mark R. Nelson, Executive Director

## PUBLICATIONS BOARD

### Co-Chairs

Jack Davidson

Joseph A. Konstan

### Board Members

Phoebe Ayers

Chris L. Hankin

Michael Heroux

Tulika Mitra

Michael Lloyd Nelson

Sharon Oviatt

Theo Ezell Schlossnagle

Eugene H. Spafford

Stephen N. Spencer

Divesh Srivastava

Robert A. Walker

Julie R. Williamson

### SGB Liaison

Nenad Medvidovic

## HEADQUARTERS JOURNALS STAFF

### ACM Director of Publications

Scott Delman

### Publications Operations Manager

Craig Rodkin

### ACM Journals Manager

Laura A. Lander

### Print Production Manager

Bernadette Shade

### Assistant Editor

Stacey Schick

### Administrative Assistant

Emily Eng

### Bibliographic Processing Coordinator

Anna Lacson

## EDITORIAL BOARD

### Editor-in-Chief

Philip Wadler,  
*University of Edinburgh, UK*

### Advisory Board

Giuseppe Castagna,  
*Paris Diderot University & CNRS, France*  
Jeremy Gibbons,  
*University of Oxford, United Kingdom*

Computing Machinery

## ABOUT PROCEEDINGS OF THE ACM ON PROGRAMMING LANGUAGES

*Proceedings of the ACM on Programming Languages (PACMPL)* is a Gold Open Access journal publishing research on all aspects of programming languages, from design to implementation and from mathematical formalisms to empirical studies. Each issue of the journal is devoted to a particular subject area within programming languages and will be announced through publicized Calls for Papers. All accepted papers receive two rounds of reviewing and authors can expect initial decisions regarding submissions in under 3 months. The journal operates in close collaboration with the Special Interest Group on Programming Languages (SIGPLAN) and is committed to making high-quality peer-reviewed scientific research in programming languages free of restrictions on both access and use.

## JOURNAL WEBSITE [pacmpl.acm.org](http://pacmpl.acm.org)

### SUBMISSIONS

More details, including instructions for submitting to *PACMPL*, can be found at <http://pacmpl.acm.org/>.

### Send orders to:

ACM Member Services Dept.  
General Post Office  
PO Box 30777  
New York, NY 10087-0777

### MEMBERSHIP INFORMATION

ACM Member Services Dept.  
1601 Broadway, 10th Floor  
New York, NY 10019-7434  
T: (212) 626-0500  
F: (212) 944-1318  
Email: [acmhelp@acm.org](mailto:acmhelp@acm.org)

*PACMPL* (ISSN: 2475-1421) is published quarterly in Spring, Summer, Fall, and Winter by the Association for Computing Machinery (ACM), 1601 Broadway, 10th Floor New York, NY 10019-7434

PACM is also available in the ACM Digital Library (DL), the most comprehensive collection of full-text articles and bibliographic records in existence today covering the fields of computing and information technology. The full-text database includes the complete collection of ACM's publications, including journals, conference proceedings, magazines, newsletters, and multimedia titles.

# Editorial Message

GUY L. STEELE JR., Oracle Labs, USA, *Associate Editor*

---

The Proceedings of the ACM series presents the highest-quality research conducted in diverse areas of computer science, as represented by the ACM Special Interest Groups (SIGs). The ACM Proceedings of the ACM on Programming Languages (PACMPL) focuses on research on all aspects of programming languages, from design to implementation and from mathematical formalisms to empirical studies. The journal operates in close collaboration with the Special Interest Group on Programming Languages (SIGPLAN) and is committed to making high-quality peer-reviewed scientific research in programming languages free of restrictions on both access and use.

This issue of the PACMPL journal publishes 19 articles that were submitted in response to a call for papers, as well as “letters of encouragement” sent by the program chairs to 62 specific language designers and implementation teams, seeking contributions that discuss and analyze the historical development of individual programming languages, programming language families, language features, design themes, and other strong influences on the direction of programming language design, implementation, and usage.

The articles were selected by means of an unusually rigorous multistage reviewing and shepherding process from 22 submissions that were submitted by the August 2018 deadline for first drafts. After a five-month initial review period, the program committee selected 19 of these for shepherding and further review. Second drafts for all 19 papers were submitted by August 2019. After another four-month review period, the program committee conditionally accepted all 19 papers with specific stated requirements for final revisions. “Final copy” versions of all 19 papers were submitted by the March 2020 deadline for this issue and checked one more time by the program chairs as well as by editorial staff.

I am excited by the compelling and thought-provoking work that resulted in this PACMPL issue. To provoke further discussion and dissemination, the authors were invited to also present their work to the programming languages community at the Fourth ACM SIGPLAN History of Programming Languages Conference (HOPL IV), which was to have been held in June 2020 in London (co-located with PLDI 2020) but was postponed because of the COVID-19 pandemic. Therefore I hope that you will instead be able to join us in June 2021 in Quebec City for HOPL IV (co-located with PLDI 2021). The conference will provide many opportunities to share ideas with programming language researchers and practitioners from institutions around the world.

It was an honor and a privilege to serve as *Associate Editor* for this issue of PACMPL, assisted by Richard P. Gabriel and HOPL IV Conference Historian Mark Priestley, and I would like to thank the many people who contributed to make this a success.

First, I would like to thank all the authors for contributing their papers, which they prepared and polished over a period of two and a half years, investing hundreds of hours of effort to produce the best papers possible.

Second, I would like to thank the reviewers, shepherds, and historian for their hard work; the high quality of the articles in this issue is also the result of these largely unsung volunteers. They have provided very useful feedback to the authors, in many cases spending hundreds of hours on their assignments, helping the authors to improve their work. The *Review Committee* for this issue consisted of HOPL IV Program Committee members Andrew Black, Steve Blackburn, Kim Bruce, Shigeru Chiba, Matthias Felleisen, Richard Gabriel, Brent Hailpern, Roberto Ierusalimsky,

Ralph Johnson, Crista Lopes, Mira Mezini, Ana Milanova, Jens Palsberg, Tomas Petricek, Keshav Pingali, John Reppy, Barbara Ryder, Sukyoung Ryu, Yannis Smaragdakis, Guy Steele (chair), Jean-Baptiste Tristan, Philip Wadler, Stephanie Weirich, and Allen Wirfs-Brock, plus External Reviewer Matthew Flatt. The *Shepherds* were HOPL IV Program Committee members Andrew Black, Kim Bruce, Shigeru Chiba, Richard Gabriel, Brent Hailpern, Roberto Ierusalimsky, Ralph Johnson, Crista Lopes, Mira Mezini, Jens Palsberg, Tomas Petricek, Keshav Pingali, Barbara Ryder, Sukyoung Ryu, Yannis Smaragdakis, Guy Steele, Jean-Baptiste Tristan, and Philip Wadler, plus External Shepherd Vijay Saraswat. The *Conference Historian* Mark Priestley examined every submission and provided advice to authors on how to write papers that would address history, not just technology.

Finally, I would like to thank the PACMPL Editorial Board and its Editor-in-Chief Philip Wadler for their advice, and I would like to thank SIGPLAN and its Executive Committee chaired by Jens Palsberg for supporting the gold open-access publication of the articles in PACMPL and for organizing a thriving programming language community that produces high quality research as exemplified in this issue.
